

# BUĞRA GÖKÇEK

## DevOps Engineer

bugragokcek1@gmail.com

github.com/bugra-gokcek

www.bugragokcek.com

Ankara, Türkiye

## ABOUT ME

Learning and developing skills in creating, managing, and scaling Docker and Kubernetes environments. Passionate about building Linux system environments and exploring all aspects of Linux systems. Eager to enhance knowledge and contribute to projects involving infrastructure and system management.

## WORK EXPERIENCE

### DEVOPS ENGINEER

#### KLOUDSER TECHNOLOGIES

Ankara

Jan 2025 - Current

Architected and maintained hybrid cloud infrastructure (AWS + On-Premises) for multiple cybersecurity products across cloud and on-premises environments. Implemented CI/CD automation pipelines and deployed self-hosted applications for development and production use. Administered virtualization infrastructure and configured mobile security testing environments. Provided comprehensive system administration support and monitoring of server resources across development and production environments. Maintained network security through firewall management.

### DEVOPS & SOFTWARE ENGINEER

#### OCTAPULL

Eskişehir

Jul 2024 - Jan 2025

Maintenance, development, and monitoring of servers for development and testing environments of Octapull products. Utilizing Docker and Kubernetes technologies across all products. Monitoring the OctaMeet application using Grafana and Prometheus. Development of the Octapull SFA (Field Sales Automation) product.

### SOFTWARE ENGINEER INTERN

#### ANADOLU UNIVERSITY

Eskişehir

Jul 2023 - Aug 2023

I completed a 25-day summer internship at Anadolu University Computer Research and Application Center. I have learned Bashscripting basics and dynamic web applications with Express.js.

### SOFTWARE ENGINEER INTERN

#### KONNEKA INFORMATION AND COMMUNICATION TECHNOLOGIES

Ankara

Sep 2022- Dec 2022

I completed a long-term internship at Konneka Information and Communication Technologies. During this period, I worked in a Linux environment and contributed to the development of cybersecurity products with Javascript (Puppeteer, Socket.IO) related to mobile devices.

## EDUCATION
